PLAGIARISM AGREEMENT

Plagiarism Agreement

Plagiarism Agreement*

The Fulbright Foreign Student Program seeks applicants whose writing achieves the highest academic standards of original research, writing, and citation. The program application includes the opportunity to describe your academic work, research, and personal objectives. Application materials will be processed using software to help identify any instance of plagiarism. **Plagiarism in any part of your application will result in your disqualification from participating in the Fulbright Foreign Student Program.**

From the Oxford English Dictionary:

"Plagiarism is the wrongful appropriation or purloining and publication as one's own, of the ideas, or the expression of the ideas of another."

Plagiarism will be understood to include any of the following:

Presenting wording, statistics or concepts as your own which should be attributed to someone else or to publications (online or offline). This includes, but is not limited to:

- Copying the exact wording of a written source with or without citation
- Presenting material with alterations in wording with or without citation
- Paraphrasing the content of a source without citation

It is expected that your responses to all questions in the following application will be your own work and writing, with clear citation of secondary sources if describing academic work and the writing of others (including one's own previously published work). Any sources used in the construction of your responses must be clearly cited.

By indicating "Yes" in the question below, you are acknowledging that you understand both what actions constitute plagiarism in this application, and the consequences resulting from any plagiarism found in your submission.

Some US universities and colleges have developed and published policies on the use of generative artificial intelligence (GenAI) on applications for admission or affiliation with their institution. Some institutions may scan applications for the use of language produced by GenAI. While individual institutional policies range widely and policy responses from US universities will continue to evolve, copying language/content produced by GenAI directly into your application may negatively impact admission or affiliation decisions.

I have reviewed and understand the above information on the importance of presenting my own original work in the Fulbright Foreign Student Program application. I agree to properly cite any outside sources from which I take words or ideas in the composition of my application.

I understand the consequences of plagiarism in my application. *

You will be ineligible for the program if any part of your Fulbright application is found to have been plagiarized.

University Preferences

It is not a requirement nor is it expected for you to identify institutions at which you would like to study. However, please list in priority order up to four schools of your choice, providing a preference. Indicate specific departments and/or programs. Give specific reasons for each choice. If you have been in contact with professors, please provide names and email and/or phone contacts for each one. Your preferences will be taken into consideration insofar as possible. However, please understand that there is no guarantee that your application will be sent to these programs. Applications are made on your behalf to programs that provide a good 'academic fit' based on your study plans and your competitiveness. The goals and priorities of your scholarship sponsor are also strongly considered.

Please select how many University Preferences you would like to add.
